ABDULLAH KHAN

Front-End Software Engineer

Islamabad, Pakistan | akdevjs@gmail.com | +92 340 552 0404 | LinkedIn | GitHub | Abdullah's Portfolio

PROFESSIONAL SUMMARY

Front-end software engineer with 3+ years of experience building high-performance, mobile-first React and Next.js applications across healthcare, edtech, and AI sectors. Specializes in scalable component architecture, advanced animations, and AI-powered chat interfaces. Currently delivering cross-platform React Native experiences and large-scale UI systems at Leet Pros. Proven track record of reducing load times, boosting data handling efficiency, and collaborating across cross-functional teams under Agile workflows.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks & Libraries: React.js, Next.js, React Native, Framer Motion
State Management: Redux, Zustand, Context API
Styling & UI: Tailwind CSS, Storybook, shadcn-ui, Responsive Web Design
Data & APIs: TanStack Query, GraphQL, RESTful APIs
Tooling & Testing: Vite, Git, GitHub, React Testing Library
Other: Cross-Browser Compatibility, Agile/Scrum, Performance Optimization

PROFESSIONAL EXPERIENCE

Software Engineer | Leet Pros *Sept 2024 – Present*

- Built a cross-platform React Native app consolidating all ELL products into one application, improving accessibility and streamlining the user experience across iOS and Android.
- Led end-to-end UI development on 4 large-scale products — ChampionsCube, DomexaAI, Ell Junior, and Mockly — delivering pixel-perfect, production-ready interfaces.
- Revamped a 40+ lesson gamified English learning platform (Ell Junior), redesigning complex interactive flows, avatar systems, and game-based UI elements.
- Developed AI-powered chat interfaces in DomexaAI with multimodal support (text, image, video, audio) and RAG-based retrieval flows.
- Reduced frontend load times by 25% through performance optimization, code splitting, and a reusable component architecture.
- Implemented scalable admin dashboards for content management, improving data handling efficiency by 30%+.
- Engineered high-performance, mobile-first UIs with advanced animations and loaders using Framer Motion across all projects.

Full-Stack Software Engineer | Vigorant *Aug 2023 – Sept 2024*

- Promoted to lead frontend engineer of My Vigorant — a comprehensive marketing management dashboard enabling clients to monitor websites, integrate social media, manage comments, and deploy AI-powered reply bots.
- Built 10+ SEO-optimized websites for healthcare clients, implementing meta tags, structured HTML, and UX best practices — achieving 100% compliance with SEO ranking recommendations.
- Collaborated closely with SEO teams to drive measurable improvements in site visibility and organic performance.

Front-End Engineer | 7 Stack Solutions *March 2023 – Jul 2023*

- Built UI for a Python-powered oil and gas facility management platform, integrating mapping systems and converting Excel datasets into structured, user-friendly frontend displays.
- Led creation of a hybrid interface combining LinkedIn-style professional networking and Calendly-style scheduling tools, spearheading both UI design and backend integration.
- Enabled multi-profile support allowing users to join hobbyist and professional communities and events, scaling the platform to manage 100+ workers with allocations such as beds and vehicles.

Front-End Engineer | Lukuku *April 2022 – Feb 2023*

- Delivered 7+ fully responsive client websites using React, Next.js, and TypeScript.
- Contributed UI/UX input and optimization strategies across projects, ensuring smooth delivery under Agile workflows.
- Collaborated with backend teams maintaining streamlined coordination and on-time delivery.

RECENT PROJECTS

English AcadeME Junior *React, Next.js, TypeScript, Tailwind CSS, shadcn-ui*

A gamified, movie-based English learning platform featuring 240+ lessons across 8 levels, with avatars, badges, and interactive games. Delivered a complete UI revamp and frontend redevelopment.

- Converted legacy frontend into a modern, responsive UI aligned with new design standards.
- Ensured 100% responsiveness across devices with rigorous testing on Android and iOS.
- Integrated and debugged the Kaltura video library, resolving undocumented issues to stabilize playback.

Mockly *React, Next.js, TypeScript, Tailwind CSS, shadcn-ui*

A UI/UX inspiration platform showcasing mobile mockups and design flows for creative teams and developers. Provides a clean, searchable interface for exploring, previewing, and organizing mobile UI patterns.

- Solely responsible for building the entire frontend from scratch, delivering a production-ready platform.
- Implemented interactive mockup previews and flows with smooth navigation and optimized rendering.
- Optimized frontend performance for scalability across thousands of design assets.
